(The Churchman.)

It is seldom that a parish in the mission-field has the privilege of entertaining two bishops at the same time, but that has been the good fortune of Boise, in having the first Bishop of Idaho, Bishop Tuttle, and the new Bishop, within its borders. It is thirty-three years since Bishop Tuttle came to his vast jurisdiction, and found the present structure of St. Michael's church, the only church within the limits of Idaho, Utah, and Montana. During his years of hard labor in those pioneer days he built churches and made churchmen, so that on his visit this year, he finds the children of those whom he baptized years ago the mainstay of the Church in many of the mainstay of the Church in many of the missions. It is an interesting fact that when Bishop Tuttle was elected, he had not reached the canonical age for consecration, but, after a hard year's work, went to New York and was consecrated. Large congregations greeted him wherever he went, people driving long distances to see him again.

No less hearty is the welcome given Bishop Funsten, who is going over the furisdiction, cheering the missionaries and the faithful, so long without a chief shetherd. The Bishop spent a week at Boise, preaching in St. Michael's at the morning and evening services on August 20th. The people are delighted with his charming personality and spirit of deep consecration.

It is quite certain now that he will not be tried at that time, and probably not in November. It is even hinted at the District Attorney's office that the case may be moved in January. Although in haste to indict Molineux, that process taking eight months' time, during which Molineux was confined in the Tombs, the District Attorney deems that the prosecution has made all the running in the case, and, having secured Molineux's indictment and he being a prisoner, there is no reason, why the trial should be runshed. RAILWAY GASOLINE MOTORS,

Illinois Central Runs an Inspection Car Successfully. CHICAGO, September 13.-The Illinois Central is experimenting with an inspection car having a motor run by gasoline. Thus far the experiments have been so successful that it is quite probable the road will adopt this kind of car on all of its divisions. Several railroad men have expressed the belief that the "automobile of the rail" in a short time will come into such general use that the old hand-worked inspection cars will be but little more than legacies of the past. The ear with which the Illinois Central is experimenting has an average speed of twenty-five miles an hour, but it is capable of traveiling much more rapidly than that. One of the inspectors of the road is said to have gone seventy-five miles in two hours. A gallon of gasoline ordinarily will run the car more than seventy-five miles, and there is a provision for carrying four gallons, or enough for an unbroken run of 30 miles. Central is experimenting with an inspec-

SERIOUS RESULTS OF A KISS.

St. Louis Woman Has Blood Poisoning, Following a Slight Bite. ST. LOUIS, MO., September 13.-A kiss with the slightest bite imaginable on the cheek may result in the death of Miss Lizzle King, a young St. Louisan:

Miss Lizzle King, a young St. Louisan:
Hermann Criger, who is responsible for
the young lady's swollen head and polsoned blood, did not intend to bite her, and
says that part of it was an accident. Miss
King is now in the hospital, hovering between life and death, with the crisis in,
her case yet to be reached.
It all happened Saturday evening at a
party, where kissing games came in as
part of the entertainment. It fell to Miss
King's lot to be kissed by Mr. Criger.

#### More Than Half a Billion Dollars Paid.

NEW YORK, September 13.—Up to July 1st of the current year the Mutual Life-Insurance Company of New York has returned to its members \$500,870,737, or over half a billion of dollars, and its accumulated assets on that date were \$288,536,471. This shows that the company has practically paid out as much money to the insuring public as any other two compa-nies of like character, and that by holdng a larger amount in assets than any other company, it is beyond question largest and strongest institution of its

## A NEW KIND OF SALE.

Mr. C. A. Lockhart is Here to Explain It.

Everybody Gets What He Wants at a Mill-End Sale-Customers Buy in Quantities to Suit Cheaper

There's something new in town. Some thing new and cheap is what everybody wants.

This something new and novel is dis-

Than They Could Buy

Otherwise.

This something new and novel is distinctly American. It is a Mill-End Sale. It is conducted by Mr. C. A. Lockhart, who is the inventor and expositor of it, and who gives a daily explanation of it. A mill-end sale is a sale at which everybody gots what they want—that is, generally, however, what she wants; for the wife and the sweet girls who are learning to be careful boursewives are learning to be careful housewives are the chief patrons and beneficiaries of a mill-end sale. But the mills benefit, too. They sell their surplus stock, while the purchasers get the goods of every kind at prices which are astonishingly lowlower than they could get the articles in any other way.

A mill-end sale is not a sale of nicked-

over remnants. It is a sale of piece goods, ciothes, and grosses of all sorts of articles, which have not been offered for sale heretofore in quantities to suit. The customer does not have to take dozen articles or a bolt of cloth that is not needed in order to get what is needed

at a low price. Mr. Lockhart has invented a plan by which the miscalculating manufacturer can sell the surplus of product that he has not been able to sell to jobbers by arranging with a lot of merchants to sell the articles separately to retail customers changes in the product of the product of the sell customers. mers cheaper than they could be sold by

the ordinary means of distribution.

The mills sell all of their left-over santo Domingo, september 12.—Sent and energy of Santo Domingo, arrived here tready on board the Dominican warship tready on board the Dominican warship tready on board the cause of great festivities and expressions of satisfications. The mills sell all of their letters stock, which is as good as any stock they stock, which is as good as any stock they have made, at once to one man. Of course, they sell at low figures. The customers of a store like Miller & Rhoads get the benefit of those articles also at low figures at retail.

It is a novel method of doing business.

when the It is an honest, practicable, and the roughly commendable way of having a great sale in a short time.

#### SOUTHERNERS ENLISTING. Reports to the Contrary Notwith-

standing-Washington Personals. WASHINGTON, D. C., September 13 .-(Special.)-The published statement that the young men of the South were not responding to the call for volunteers is not

borne out by the callstments record so far, it appears. "We have received larger percentage of recruits from the South, according to population," said Ad-jutant-General Corbin to your correspond. ent to-day, "than from any other section of the country. This may seem strange, but it is nevertheless true. Texas and Georgia are the banner States, so far as enlistments are concerned, while Missis-The 'bush negroes' of Surinam, Dutch States.
